COURSE SYLLABUS

Academic Year 2025 - 26, Semester – [Fall / Spring]

ENT 142 – Fundamentals of Innovation and Entrepreneurship 2

Suggested version · updated 27 October 2026 · for department review

1. COURSE INFORMATION

Course Title:	Fundamentals of Innovation and Entrepreneurship 2			
Course Code:	ENT 142			
Course Identity:	Build & Test · Year 2 of the ENT journey			
Course Credit:	0-2-1			
Contact Hours:	Lec [00 Hrs], Lab/Non-Lec [30 Hrs] Total: 30 Hrs (2-hour lab weekly)			
Course Pre-requisite(s):	ENT 141			
Course Co-requisite(s):	None			
Course Category:	University Requirement (GE):	✓	Program Requirement:	
Course Type:	Compulsory:	✓	Elective:	

2. FACULTY INFORMATION

Instructor Name:	This section will be filled at the time of offering of course.
Lecture/Lab Timings:	
Office Location:	
Office Hours:	
E-mail:	
Office Telephone:	
Course Website:	Course Website on Moodle

3. COURSE DETAILS

3.1 Course Description

This course is a continuation of ENT 141. Teams turn their ENT 141 prototype, or a CUD Incubator partner challenge, into a minimum viable product (MVP), test it with real users at a live Innovation Exhibition, and analyse the evidence for desirability, feasibility and viability. The course ends with two pitch events to an academic and external panel, scored by peer investors, and a founder learning session that prepares students for ENT 241 (Analyze & Plan). Each week is a 2-hour lab.

3.2 Course Learning Outcomes (CLOs) and Alignment to GE Learning Outcomes (GELOs)

On successful completion of this course, the student will be able to:

Course Learning Outcomes (CLOs)		PLOs
CLO 1	Explain the process of innovation, entrepreneurship and sustainability.	**6**
CLO 2	Apply skills required for effective teamwork and presentations, emphasizing sustainable approaches to solving real-life social issues through innovation.	**2**
CLO 3	Analyze the impact of innovation, entrepreneurship and sustainability on society and the economy.	**2, 6**

Course Learning Outcomes (CLOs)		PLOs
CLO 4	Articulate the value of innovation, entrepreneurship, and sustainability in shaping own career paths focusing on continuous learning and personal development.	7

4. TEACHING SCHEDULE

Week No.	Topic Covered in Class	CLOs	Reference/ Course Material	Course Assessment *(Please specify if the assessment is out-of-class)*	
				Assignment Type	Due Date*
1	**ENT 141 Prototype → MVP** • Prototype Exhibition: core value vs unnecessary features	1	Laverty & Littel (2020) §10.1		
2	**MVP Development** • Riskiest Assumption Challenge	1	Bland & Osterwalder (2019)		
3	**Prototype Building Studio 1** • MVP Build Sprint with founder check-ins	1	Bland & Osterwalder (2019)		
4	**Prototype Building Studio 2** • Break My MVP Challenge	1, 2	Bland & Osterwalder (2019)	**A1 MVP Plan + Build**	Week 4
5	**Exhibition & User-Testing Preparation** • Customer Experiment Workshop	1	Liedtka et al. (2017)		
6	**Live Exhibition** • MVP Challenge / Innovation Exhibition with real users	2, 3	Liedtka et al. (2017)		
7	**Feedback Analysis** • Feedback Detective: Keep / Change / Ignore / Need more evidence	3	Bland & Osterwalder (2019)		
8	**Testing Results** • Build–Measure–Learn Presentation	1, 3	Ries (2011); Laverty & Littel §10.1	**A2 Build–Measure–Learn Presentation**	Week 8
9	**Desirability, Feasibility & Viability** • DFV Evidence Wall	3	Bland & Osterwalder (2019)		
10	**Desirability** • Customer Evidence Court	3	Bland & Osterwalder (2019)		
11	**Feasibility & Viability** • Startup Reality Check Workshop	3	Byers et al (2019). Ch. 4, 7	**A3 DFV Evidence Report**	Week 11
12	**Open Innovation & External Input** • Open Innovation Workshop / Challenge	2, 3	Chabani et al. (2025)		
13	**Pitch Preparation** • 60-Second No-Slide Pitch + Pitch Carousel	2	Byers et al (2019). Ch. 19		
14	**Pitch Event I** • Pitch Challenge to an academic / external panel	2	Byers et al (2019). Ch. 19		
15	**Pitch Event II** • Remaining pitches · peer investor scorecard	2, 4	Byers et al (2019). Ch. 19	**A4 Pitch + Founder Reflection**	Week 15
16	**Learning & Transition** • Founder Learning Session · hand-over to ENT	4	HBR		

Week No.	Topic Covered in Class	CLOs	Reference/ Course Material	Course Assessment *(Please specify if the assessment is out-of-class)*	
				Assignment Type	Due Date*
	241				

**Due date will be included at the time of the offering of the course.*

5. TEACHING PEDAGOGY

The course is taught as a weekly 2-hour lab (0-2-1). Each lab opens with a short concept from the readings and continues with one hands-on activity (Section 4.1). Teams build and test their own minimum viable product (MVP) and keep a teamwork log with rotating roles.

Some labs may include a short contribution from a practising entrepreneur, a product designer or a CUD Incubator partner, within the scheduled class time; this does not add contact hours and does not replace the lab.

Teams may work on a challenge published by a CUD partner through the CUD Incubator, and are encouraged to enter hackathons, innovation challenges and competitions at CUD and UAE level.

Inclusive learning: Materials follow Universal Design for Learning. An Easy version of every lecture, lab, worksheet and assignment gives short numbered steps, a sentence starter, read-aloud and one part at a time, and students may show their learning by drawing, speaking or writing. Individual adjustments follow CUD's student-support process.

5.1 MVP labs (Weeks 1–4)

Prototype Exhibition (Week 1): teams show their ENT 141 prototypes; peers separate core value from unnecessary features.

Riskiest Assumption (Week 2): what must be true for the venture to work, and what the MVP must test. Teams may study the first MVP of a CUD Incubator startup.

Build Sprint and Break My MVP (Weeks 3–4): hands-on building with founder check-ins, then peer teams stress-test the MVP.

5.2 Live testing and evidence (Weeks 5–11)

Prepare (Week 5): hypotheses, observation sheets, feedback cards, stall design, visitor roles and a 30-second explanation.

Live Exhibition (Week 6): real users interact with the MVP; the instructor observes individual participation.

Analyse (Weeks 7–11): Feedback Detective, Build–Measure–Learn presentation, DFV Evidence Wall, Customer Evidence Court and Startup Reality Check.

5.3 Pitch training and pitch events (Weeks 13–16)

Training (Week 13): 60-second no-slide pitch, then a pitch carousel to different audiences, improving after every round.

Pitch Events I and II (Weeks 14–15): teams pitch to an academic and external panel; individual questions check understanding.

Peer investor scorecard: students invest CUD Coins in other teams (not their own, at most 40% in one team). Coins are not graded; the pitch is graded on the rubric.

Founder Learning Session (Week 16): what did the market prove us wrong about? The answer feeds the individual reflection.

6. TEXTBOOK/REFERENCE BOOK/COURSE MATERIAL

Textbooks (TB):

a. Byers, T., Dorf, R. C., & Nelson, A. J. (2019). Technology ventures: From idea to enterprise (Fifth ed.). McGraw-Hill Education. ISBN13: 9781259875991.

Reference Books (RB):

a. Bland, D. J., & Osterwalder, A. (2019). Testing Business Ideas. Wiley.

b. Laverty, M., & Littel, C. (2020). Entrepreneurship. OpenStax. (Free, open textbook.)

c. Liedtka, J., Salzman, R., & Azer, D. (2017). Design thinking for the greater good: Innovation in the social sector. Columbia University Press. ISBN-13: 978-0231179522

d. Chabani, Z., Askri, S., & Kweh, Q. L. (Eds.) (2025). Sustainable Innovation in the Middle East and North Africa (MENA) Region. IGI Global.

Suggested Readings (SR):

a. Ries, E. (2011). The Lean Startup. Crown Business.

b. Traifeh, H., Abou Refaei, R., von Thienen, J., von Schmieden, K., Mayer, L., Osman, S., & Meinel, C. (2021). Mapping Design Thinking in the Arab World. In Design Thinking Research. Springer, Cham. p. 41-60.

Students are also required to read a variety of Harvard Business Review (HBR) materials that are available online. The university should therefore provide each student with access to HBR online, which is typically done through the university library system.

7. LEARNING RESOURCES

Course website on Moodle contains class announcements, lecture notes, assignments and submission links. An interactive course website supports the classes with lecture scenes, lab guides and a course assistant; it does not replace classes, attendance or class activities. The CUD Incubator challenge board publishes partner challenges.

8. COURSE ASSESSMENT AND EVALUATION

The information concerning the appropriate distribution of grade weight amongst various assessment items and their corresponding linkage with the stated CLOs is provided in the following table.

Assessment Items		Grade Weight (%)	Course Learning Outcomes			
			1	2	3	4
A1	MVP plan + build (Week 4)	25	✓			
A2	Build–Measure–Learn presentation (Week 8)	25	✓		✓	
A3	DFV evidence report (Week 11)	25			✓	
A4	Pitch + founder reflection (Week 15)	25		✓		✓

9. ASSESSMENT METHODOLOGY

All four assignments follow a block of study and are created in class, so every student practises with the instructor present.

A1 – MVP plan + build (Team, Week 4, 25%): Core value, riskiest assumption and a first MVP, stress-tested in Break My MVP.

A2 – Build–Measure–Learn presentation (Team, Week 8, 25%): We believed → we tested → users showed → we learned → therefore. Each member explains one part, with evidence.

A3 – DFV evidence report (Team, Week 11, 25%): Desirability, feasibility and viability evidence, the biggest gap, and what the team will do about it.

A4 – Pitch + founder reflection (Team + individual, Week 15, 25%): Pitch to the panel with Q&A, peer investor scorecard, and a one-page founder reflection in Week 16.

10. COURSE REQUIREMENTS AND POLICIES

The students are required to fully understand and observe the following policies of the university.

10.1 Attendance Policy

Attending classes is compulsory in all courses. CUD Students will not be allowed to take the final examination if they are absent for 25% or more of the classes in a course. (Students should refer to their respective Department or School/Faculty for additional specific program-related information.)

a. When a student has been absent for 10% of the course an absence reminder would be sent by email.
b. When a student has been absent for 20% of the course a second absence reminder would be sent by e-mail
c. When a student has been absent for 25% of the course a notice of Failure for Non-Attendance will be sent by email and grade “FA” with Grade Point of 0.0 will be awarded.

A student with a verifiable and legitimate reason for missing a class (e.g., hospitalization) may request his instructor not to count such an absence towards the 25%. Such excusable absences must be noted in the Course File Attendance Report.

Should an acceptable explanation for a student’s absenteeism be available, the Dean/Designated Representative of the Faculty concerned may consider the student’s withdrawal without penalty from the particular course. A withdrawal without penalty or any other alpha grade under these circumstances may only be considered with the consent of the Registrar.

10.2 Incomplete Work Policy

Students whose course work is at a passing level but who for verifiable reasons beyond their control are unable to finish course work by the end of a term (or the specified end of a course) may be granted a grade of "Incomplete".

The “I” is not intended to be a permanent grade. It is only a temporary acknowledgment of a legitimate reason for granting a one-time, limited extension to the time normally allowed to complete all course requirements.

Students have up to 12 calendar months after the scheduled end of the course to complete required additional work as determined by the teacher who assigned the “I”, and to thereby qualify for a passing grade.

After 12 calendar months, outstanding "I" grades are converted to "F".

Thereafter, the student must repeat the course in order to achieve a passing grade.

The number of "Incomplete" courses allowed per semester is established by the School. Please contact the School for further information.

NOTE: An Incomplete grade for a pre-requisite course must be completed before the student is allowed to proceed to the higher-level course unless otherwise approved by the appropriate Academic Administrator (Dean or Designate).

10.3 Academic Integrity

Cheating refers to attempting or using unauthorized materials or obtaining unauthorized assistance in an academic activity, including all types of examinations or evaluations. This may include impersonating another student; looking at another student's materials; using unauthorized notes/books/calculators; talking to other students; using communication devices such as mobile phones or any Bluetooth devices.

Plagiarism includes, but is not limited to, representation of others' work, lending unauthorized assistance, and using strategies or processes with the aim of attaining dishonest grades on tests or examinations. Students may not submit any material created by or acquired from another person or business. Plagiarizing any type of course work will not be tolerated. All instances of plagiarizing shall be documented, presented to the Head/Dean of the program and to the Registrar, and recorded in the student's file. The maximum permissible similarity index limit is 20% for the assignments required to be submitted through Turnitin.

Any violation of the academic integrity policy is a serious offence which will be sanctioned as per the Academic Integrity Policy published in the Student Handbook. Please refer to the Catalogue for further information on student Academic Integrity.

11. GRADING SYSTEM

The University uses the relative grading system which is based on a four-point scale. An overall grade will be assigned on the following grading scale.

Percentage Score	Alpha Grade	GPA Points	Percentage Score	Alpha Grade	GPA Points
90-100	A+	4.0	60-64	C	2.0
80-89	A	3.8	55-59	D+	1.5
75-79	B+	3.5	50-54	D	1.0
70-74	B	3.0	0-49	F	0.0
65-69	C+	2.5			

The students must also read and comprehend the full version of the "Grading System" of the University which is published in the relevant Catalogue.

12. GRADING RUBRICS FOR ASSESSED ELEMENTS

Grading Rubric for A1: MVP plan + build (25 marks)

A1: MVP plan + build	Excellent (100–81%)	Good (80–61%)	Developing (60–41%)	Weak (40–0%)
Core value (6 marks)	Fully meets the criterion, with clear evidence.	Mostly meets it; minor gaps.	Partly meets it; important gaps.	Little or no evidence.

A1: MVP plan + build	Excellent (100–81%)	Good (80–61%)	Developing (60–41%)	Weak (40–0%)
Assumption (6 marks)	Fully meets the criterion, with clear evidence.	Mostly meets it; minor gaps.	Partly meets it; important gaps.	Little or no evidence.
MVP (8 marks)	Fully meets the criterion, with clear evidence.	Mostly meets it; minor gaps.	Partly meets it; important gaps.	Little or no evidence.
Fixes (5 marks)	Fully meets the criterion, with clear evidence.	Mostly meets it; minor gaps.	Partly meets it; important gaps.	Little or no evidence.

Grading Rubric for A2: Build–Measure–Learn presentation (25 marks)

A2: Build–Measure–Learn presentation	Excellent (100–81%)	Good (80–61%)	Developing (60–41%)	Weak (40–0%)
Experiment (6 marks)	Fully meets the criterion, with clear evidence.	Mostly meets it; minor gaps.	Partly meets it; important gaps.	Little or no evidence.
Evidence (7 marks)	Fully meets the criterion, with clear evidence.	Mostly meets it; minor gaps.	Partly meets it; important gaps.	Little or no evidence.
Learning (7 marks)	Fully meets the criterion, with clear evidence.	Mostly meets it; minor gaps.	Partly meets it; important gaps.	Little or no evidence.
Explanation (5 marks)	Fully meets the criterion, with clear evidence.	Mostly meets it; minor gaps.	Partly meets it; important gaps.	Little or no evidence.

Grading Rubric for A3: DFV evidence report (25 marks)

A3: DFV evidence report	Excellent (100–81%)	Good (80–61%)	Developing (60–41%)	Weak (40–0%)
Desirability (7 marks)	Fully meets the criterion, with clear evidence.	Mostly meets it; minor gaps.	Partly meets it; important gaps.	Little or no evidence.
Feasibility (6 marks)	Fully meets the criterion, with clear evidence.	Mostly meets it; minor gaps.	Partly meets it; important gaps.	Little or no evidence.
Viability (6 marks)	Fully meets the criterion, with clear evidence.	Mostly meets it; minor gaps.	Partly meets it; important gaps.	Little or no evidence.
Next test (6 marks)	Fully meets the criterion, with clear evidence.	Mostly meets it; minor gaps.	Partly meets it; important gaps.	Little or no evidence.

Grading Rubric for A4: Pitch + founder reflection (25 marks)

A4: Pitch + founder reflection	Excellent (100–81%)	Good (80–61%)	Developing (60–41%)	Weak (40–0%)
Problem and user evidence (5 marks)	Quotes and observations from real users.	Some evidence, partly assumed.	Partly done; important gaps.	No user evidence.
MVP and test results (5 marks)	Clear tests and the changes they caused.	Tests done, little change.	Partly done; important gaps.	No testing.
Desirability, feasibility, viability (5 marks)	Evidence for all three, gaps named.	One or two covered.	Partly done; important gaps.	Not addressed.
Delivery and Q&A (5 marks)	On time, clear, confident answers.	Over time or unclear in places.	Partly done; important gaps.	Unprepared.
Founder reflection (individual) (5 marks)	Specific lessons and next steps.	General reflection.	Partly done; important gaps.	Missing.

13. VERIFICATION

(i) I verify that the contents of this document are up to date.

Instructor's Name and Signature Date

(ii) I have reviewed this course syllabus and state that it complies with CUD policies and guidelines.

_____ _____

Name and Signature of Department Chair/Program Coordinator Date

Note: *This page of the course syllabus is only for the purpose of documentation and therefore it should not be distributed to the students.*
